<b>THE RIEDEL HISTORY</b>	74-77
---------------------------	-------

RIEDEL Crystal is a 300 year-old family owned company known for the creation and development of varietal-specific stemware. RIEDEL Crystal was the first in history to recognize that the taste and aroma of a beverage is affected by the shape of the vessel from which it is consumed, and has been recognized for its revolutionary designs complementing alcoholic beverages and other drinks.

Founded in 1756 and pioneering grape varietal-specific stemware since 1958, RIEDEL has become the brand of choice for wine connoisseurs and drink specialists, hospitality professionals and consumers globally.

RIEDEL glassware is distributed worldwide and can be found at all good retailers and fine dining destinations.

#### 10<sup>TH</sup> + 11<sup>TH</sup> GENERATION

Georg J. Riedel and Maximilian J. Riedel

RIEDEL GLASS KUFSTEIN

The **RIEDEL TRADEMARK** dates from the Art Nouveau period at the end of the nineteenth century, and was used for RIEDEL glassware made in Bohemia from 1890 to 1925. In 1996, to commemorate RIEDEL'S 240<sup>th</sup> anniversary, we reintroduced this trademark for all our handmade/hand-finished products. The distinctive Riedel signature is now featured on the base of all handmade/hand-finished products. This *Riedel* signature trademark helps our customers to distinguish immediately between handmade/hand-finished products and those made by machine. Our machine-made products carry this **RIEDEL** trademark. The RIEDEL glass dynasty is built on the creative energies of a long line of glassmakers. The story begins in 1756 in Bohemia and continues right down to the united Europe of today, taking in some of the most dramatic events in European history along the way.

A **RIEDEL** glass turns a sip of wine into a celebration!

**CAUTION:** this is a grape varietal specific wine tool! This shape works best with wines made from specific grapes. Please read the instructions below to guarantee maximum enjoyment.

**RIEDEL** has researched the grape varietal sensation, leading to the conclusion, on which the world's wine experts agree; that the enjoyment of the aroma, taste, texture and finish of a wine, is maximized by using the right „**WINE TOOL**“.

## ABOUT RIEDEL CRYSTAL

- RIEDEL CRYSTAL (established 1756) has been producing glass in the heart of Europe for over 260 years and eleven generations.
- Family owned and operated by GEORG J. RIEDEL (10<sup>th</sup> generation) and MAXIMILIAN J. RIEDEL (11<sup>th</sup> generation).
- RIEDEL is recognized worldwide for designing and producing the highest quality glasses and decanters for wine and spirit enjoyment. Top-rated wineries and restaurants throughout the world use RIEDEL. RIEDEL produces collections for every lifestyle and price range, whether for critical wine evaluation, a picnic or dinner. There is a series for every wine lover.

## AT RIEDEL, CONTENT COMMANDS SHAPE

Wine friendly glassware delivers the aroma and the flavor of all aromatic beverages.

- In the late 1950's CLAUS RIEDEL was the first to develop and introduce wine friendly stemware.
- Wine friendly stemware translates the bouquet, taste, balance and finish of a wine to the senses.
- Based on this principal RIEDEL introduced the concept of grape-specific glassware.

## WHY SHAPE MATTERS

- Stemware consists of three parts: the bowl, stem and base.
- The height of the stem and the width of the base are part of the glass design (known as the architecture).
- Grape varietal specific stemware features finely-tuned glass bowls consisting of three variables: shape, size, and rim diameter.
- Grape varietal specific stemware has to translate the "message" of wine to the human senses.

There are 4 sensations in wine.

1. **Bouquet:** Grape varietal-specific stemware is responsible for delivering the quality and intensity of the wine's aroma.
2. **Texture:** Grape varietal-specific stemware highlights the exciting and diverse styles of „mouthfeel“ in wine (watery, creamy, silky, velvety).
3. **Taste:** Grape varietal-specific stemware creates a balanced interaction between the fruit, minerality, acidity and bitter components of a wine.
4. **Flavor:** Grape varietal-specific stemware offers a pleasant, seamless, harmonious, and long lasting aftertaste.

## ARCHITECTURE OF STEMWARE

Comprises three parts: bowl – stem – base.

The design (architecture or construction) of a stemmed glass must ensure that the size, height and width are in perfect harmony. The size of the bowl has to be in proportion to the height of the stem and the width of the base. Respecting the exact ratio between these dimensions ensures the glass is correctly and seamlessly proportioned. Table top "classics" are composed using the magic "golden architectural formula". Early glass architecture, around 1920, took the lead, spearheaded by three Viennese architects (Loos, Hoffmann, Ertl). CLAUS J. RIEDEL's designs from the late 1950's, reestablished and took on this concept, which combined with influence from French and Irish classics resulted in stemware featuring this "construction", which is so pleasing to the eye.

## SERVING TO MAXIMIZE ENJOYMENT

- Glass hygiene: Serve beverages only in sparkling, clean, odorless glasses.
- Serving temperature: Do not over-chill white wines and sparkling wines, serve red wines below room temperature.
- Serving per glass: Maximum 3 to 6 US fl. oz/100 to 125 ml: Never overpour the glass.
- The ample, gracious glass volume offers great wines the room to breathe and to express their unique message of the aroma.

## CARING FOR YOUR RIEDEL CRYSTAL

- MOST RIEDEL GLASSES ARE DISHWASHER SAFE!
- RIEDEL exclusively recommends Miele dishwashers.
- To avoid scratches: Avoid glass contact with other glass or metal. If available use a stemware rack.
- To avoid stains: Use soft water (low mineral content).
- To remove stains: Use white vinegar.
- If washing by hand, wash the glass under warm water (use detergent and rinse the glass carefully).
- Wash cleaning towels with odorless soap.
- Never use linen softener when rinsing your cleaning towels (to avoid grease film on surface).
- To polish the glass: Use two towels, never hold the glass by the base to polish the bowl as the stem could snap due to mishandling.
- Avoid storing glasses in kitchen cabinets next to items with a strong odour, as this can taint the glass and have an effect on the wine's aroma.

FOR INFORMATION ON GLASS CARE AND HOW TO WASH GLASSWARE, VISIT RIEDEL.COM.

## **SELECTING THE RIGHT RIEDEL GLASS**

RIEDEL offers the option of either 'varietal specific' glasses, for dedicated wine lovers, or 'wine friendly' glasses, for informal wine drinkers. When choosing a grape varietal specific RIEDEL glass, consider that it is designed for, and performs at its best with, a specific type of wine. A grape varietal specific RIEDEL glass is a wine tool – 'the key to wine' – shaped to unlock the most elusive characteristics.

Visit our Wine Glass Guide at **RIEDEL.COM** to identify the right glass for your wine.

## **HOW MUCH TO INVEST IN ONE GLASS?**

Plan to invest in one glass the same amount as you would normally spend on a bottle of wine.

## **IS THERE ONE GLASS FOR ALL MY WINES?**

The most versatile shapes for red and white wines are GRAPE@RIEDEL and our RIEDEL Wine Friendly Collection.

## **DOES ONE GLASS FIT ALL?**

One glass can never provide the optimum experience for all styles of wine. A wine's bouquet, taste, balance and finish are all influenced by the shape of the glass from which it is consumed. A wine will display very different characteristics when served in different glass shapes. These differences can be so great, that even experienced wine connoisseurs have believed that they are tasting as many different wines as there are different glasses. RIEDEL has created shapes that specifically enhance a wine's harmony and highlight its unique characteristics. Grape varietals carry in their DNA unmistakable flavor profiles, which add to the importance of selecting the appropriate glass. Wines have two, three or four flavor contributors which are associated with the fermentation.

RIEDEL has extensively researched the impact of the size and shape of the glass across all popular grape varieties, leading to the conclusion, on which the world's wine experts agree: the aroma, taste, texture, finish and enjoyment of wine, is maximized by using the correct 'WINE TOOL'.

Two flavor contributors: floral white wines – aroma and taste are dominated by fermented grape juice and the flavor of yeast.

RIESLING GRAND CRU (13-3/8 US fl. oz, 380 ccm)

Three flavor contributors: oak-aged white wines – aroma and taste are dominated by fermented grape juice, the flavor of yeast, and oak influence (malolactic fermentation, gentle wood flavors combined with aging and aeration).

MONTRACHET/CHARDONNAY (18-3/8 US fl. oz, 520 ccm)

Four flavor contributors: oak-aged red wines – aroma and taste are dominated by fermented grape juice, the flavor of yeast, maceration (fermentation of skin and juice) and oak influence (malolactic fermentation, gentle wood flavors combined with aging and aeration).

CABERNET (30-3/8 US fl. oz, 860 ccm)

## WHY SHOULD I USE A DECANTER? HOW WILL DECANTING ENHANCE MY WINE EXPERIENCE?

- There are two reasons for which we decant wines:
  1. Decant older wine to separate it from its sediment.
  2. Decant younger wines to increase oxygenation, reveal more complexity, and open up aromas and flavors.
- To fully enjoy young wines (up to 10 years for both red and white) consider opening them 8 - 12 hours prior to consumption for oxidization or decant the wine as this shortens the aeration process.
- The main preserving element in wine is carbon dioxide which becomes part of the wine during the first (= alcoholic) fermentation.
- Decanting diminishes the amount of carbon dioxide and "matures" the wine, allowing the bouquet to develop faster.
- On the palate, decanted wine expresses higher levels of fruit in red wines and tends to integrate and smooth out tannins.
- When decanting young wines, turn the bottle directly into the decanter and let it splash into the vessel to promote oxygenation.
- When decanting off the sediment of an old wine, slowly pour the wine into the decanter without allowing any sediment to leave the bottle.
- Try the following: Using identical glasses, decant half the bottle and serve the other half directly from the bottle – then draw your own conclusion.

## CHRISTIAN MOUEIX, PRESIDENT OF THE NÉGOCIAINT HOUSE ÉTABLISSEMENTS JEAN-PIERRE MOUEIX:

"I prefer to decant wines, both young and old. It is a sign of respect for old wines and a sign of confidence in young wines. Decanting old wines, just a few moments before they are served, helps to ensure that the wines' clarity and brilliance are not obscured by any deposit that may have developed over time. Decanting young wines several hours before they are served gives the wine a chance to bloom and attain a stage of development that normally requires years of aging."

## HANDMADE/HAND-FINISHED PRODUCT

The origin of blown glassware dates back 2000 years. The Romans were the first to use this technique. At RIEDEL, in Kufstein, we produce handmade and hand-finished crystal glassware. Each handmade and handmade item is individually crafted/hand-finished by our master glassmakers. The expertise of these craftsmen guarantees that the quality of each glass meets the high standard for which our brand is known. Because of the handmade/hand-finishing, small tolerances in the size and weight of each glass, tiny bubbles/imperfections and slight surface variations are a feature and an acceptable part of the process.

**RIEDEL**  
THE WINE GLASS COMPANY  
GRAPE VARIETAL SPECIFIC®

# sommeliers

**SOMMELIERS (1973):** The introduction of the SOMMELIERS series in 1973 achieved worldwide recognition. A glass was born that turns a sip into a celebration – a wine's best friend – fine-tuned to match the grape! We invite you to share this fascinating and unique experience. You don't need to be a wine writer, a wine maker or an expert to taste the difference that a RIEDEL glass can make.

- RIEDEL'S CLASSIC
- THE FIRST VARIETAL SPECIFIC STEMWARE LINE
- HANDMADE

4400/00 • BORDEAUX GRAND CRU

Height: 270 mm, 10-5/8 inch  
Widest Ø: 106 mm, 4-1/8 inch  
Capacity: 860 ccm, 29-1/8 US fl. oz  
Design: 1959

4400/16 • BURGUNDY GRAND CRU

Height: 248 mm, 9-3/4 inch  
Widest Ø: 114 mm, 4-1/2 inch  
Capacity: 1050 ccm, 35-1/2 US fl. oz  
Design: 1958

4400/31 • TINTO RESERVA

Height: 248 mm, 9-3/4 inch  
Widest Ø: 96 mm, 3-3/4 inch  
Capacity: 620 ccm, 21 US fl. oz  
Design: 1987

4400/30 • HERMITAGE

Height: 235 mm, 9-1/4 inch  
Widest Ø: 96 mm, 3-3/4 inch  
Capacity: 590 ccm, 20 US fl. oz  
Design: 1995

4400/15 • ZINFANDEL

Height: 226 mm, 8-7/8 inch  
Widest Ø: 81 mm, 3-1/4 inch  
Capacity: 380 ccm, 12-7/8 US fl. oz  
Design: 1991

4400/0 • MATURE BORDEAUX

Height: 216 mm, 8-1/2 inch  
Widest Ø: 80 mm, 3-1/8 inch  
Capacity: 350 ccm, 11-7/8 US fl. oz  
Design: 1973

4400/04 • ROSÉ

Height: 178 mm, 7 inch  
Widest Ø: 76 mm, 3 inch  
Capacity: 200 ccm, 6-3/4 US fl. oz  
Design: 1973

4400/33 • LOIRE

Height: 235 mm, 9-1/4 inch  
Widest Ø: 79 mm, 3-1/8 inch  
Capacity: 350 ccm, 11-7/8 US fl. oz  
Design: 1997

4400/15 • RIESLING GRAND CRU

Height: 226 mm, 8-7/8 inch  
Widest Ø: 81 mm, 3-1/4 inch  
Capacity: 380 ccm, 12-7/8 US fl. oz  
Design: 1991

4400/0 • CHABLIS/ CHARDONNAY

Height: 216 mm, 8-1/2 inch  
Widest Ø: 80 mm, 3-1/8 inch  
Capacity: 350 ccm, 11-7/8 US fl. oz  
Design: 1973

4400/01 • RHEINGAU

Height: 206 mm, 8-1/8 inch  
Widest Ø: 70 mm, 2-3/4 inch  
Capacity: 230 ccm, 7-3/4 US fl. oz  
Design: 1973

4400/07 • MONTRACHET

Height: 200 mm, 7-7/8 inch  
Widest Ø: 102 mm, 4 inch  
Capacity: 520 ccm, 17-5/8 US fl. oz  
Design: 1973

4400/55 • SAUTERNES

Height: 200 mm, 7-7/8 inch  
Widest Ø: 85 mm, 3-3/8 inch  
Capacity: 340 ccm, 11-1/2 US fl. oz  
Design: 1989

4400/28 • VINTAGE CHAMPAGNE GLASS

Height: 245 mm, 9-5/8 inch  
Widest Ø: 72 mm, 2-7/8 inch  
Capacity: 330 ccm, 11-1/8 US fl. oz  
Design: 1985

4400/08 • CHAMPAGNE GLASS

Height: 245 mm, 9-5/8 inch  
Widest Ø: 70 mm, 2-3/4 inch  
Capacity: 170 ccm, 5-3/4 US fl. oz  
Design: 1973

4400/58 • CHAMPAGNE WINE GLASS

Height: 235 mm, 9-1/4 inch  
Widest Ø: 85 mm, 3-3/8 inch  
Capacity: 445 ccm, 15 US fl. oz  
Design: 2020

## 4400/88 • SPARKLING WINE

Height: 215 mm, 8-1/2 inch  
Widest Ø: 72 mm, 2-7/8 inch  
Capacity: 125 ccm, 4-1/4 US fl. oz  
Design: 1982

## 4400/20 • WATER

Height: 130 mm, 5-1/8 inch  
Widest Ø: 73 mm, 2-7/8 inch  
Capacity: 340 ccm, 11-1/2 US fl. oz  
Design: 1987

## 4400/18 • SHERRY

Height: 211 mm, 8-1/4 inch  
Widest Ø: 58 mm, 2-1/4 inch  
Capacity: 190 ccm, 6-1/2 US fl. oz  
Design: 1980

## 4400/18 • TEQUILA

Height: 211 mm, 8-1/4 inch  
Widest Ø: 58 mm, 2-1/4 inch  
Capacity: 190 ccm, 6-1/2 US fl. oz  
Design: 1980

## 4400/60 • VINTAGE PORT

Height: 172 mm, 6-3/4 inch  
Widest Ø: 72 mm, 4-7/8 inch  
Capacity: 250 ccm, 8-1/2 US fl. oz  
Design: 1992

## 4400/70 • COGNAC XO

Height: 165 mm, 6-1/2 inch  
Widest Ø: 67 mm, 2-5/8 inch  
Capacity: 170 ccm, 5-3/4 US fl. oz  
Design: 1989

4400/71 • COGNAC VSOP

Height: 165 mm, 6-1/2 inch  
Widest Ø: 67 mm, 2-5/8 inch  
Capacity: 160 ccm, 5-3/8 US fl. oz  
Design: 1989

4400/80 • SINGLE MALT WHISKY

Height: 115 mm, 4-1/2 inch  
Widest Ø: 66 mm, 2-5/8 inch  
Capacity: 200 ccm, 6-3/4 US fl. oz  
Design: 1992

Design: 2003

The image is a composite of two photographs. On the left, there is a graphic for Riedel's 50th anniversary. It features a large, stylized '50' in gold, with 'YEARS' written in a smaller circle at the bottom of the '0'. To the right of the '50' is the word 'RIEDEL' in a bold, serif font, with 'sommeliers' written in a smaller, lowercase, sans-serif font directly beneath it. Below this, the word 'sommeliers' is repeated in a larger, lowercase, sans-serif font, with a thin horizontal gold bar above and below it. The text 'SINCE 1973' is centered on this bar. On the right side of the composite image is a portrait painting of a man, identified as Claus J. Riedel, looking slightly to the left. He has short, light-colored hair and is wearing a suit jacket, a light-colored shirt, and a red tie. A wine glass is visible in the lower-left foreground of the painting.

CLAUSS J. RIEDEL, 9<sup>TH</sup> GENERATION

**RIEDEL SUPERLEGGERO** is a masterpiece of state-of-the-art technology. The perfection of a machine-made glass compared to handmade lies in the precision of the bowl and rim diameter and its consistent quality. The collection includes the largest, thinnest, and lightest glasses with the widest base diameter ever produced on machine. Riedel Superleggero glasses are fine-tuned instruments, specifically shaped to enhance your wine enjoyment. Perfectly balanced, grape varietal specific and with the look and feel of a handmade glass. The collection features eight grape varietal shapes.

- GRAPE VARIETAL SPECIFIC BOWL
- PREMIUM MACHINE MADE
- LARGEST BASE EVER PRODUCED ON MACHINE
- GRAPE VARIETAL SPECIFIC CODE

On the center of the base, below the stem, you will find a **CODE** which assists in identifying the right glass for your favorite **GRAPE VARIETY**.

# RIEDEL WINEWINGS

RIEDEL WINEWINGS WAS BORN AND WAS ABOUT TO TAKE FLIGHT!

**RIEDEL WINEWINGS (2020):** A flat and stretched bottom, with a wing-like shape to increase the surface area between wine and air, which increases the levels of evaporation and develops a greater intensity of aroma. When positioning one's head to the glass, the nose is closer and is exposed to the wider surface of the wine. However, this alone would not fully deliver the optimal aroma of each grape variety and so, to capture the delicate layered aromas, it was necessary to curve the glass walls and to correctly calibrate the opening of each glass with its rim diameter.

RIEDEL Winewings has seven glasses in total, three for red wines, three for white and one for champagne and sparkling wines.

# RIEDEL WINE WINGS

## OPTIC IMPACT

**RIEDEL PERFORMANCE (2018):** With three generations of research, development and experience in creating wine specific glassware Georg Riedel & Maximilian J. Riedel have created RIEDEL Performance; the ultimate loudspeaker for fine wine. Lightweight, durable and dishwasher safe, RIEDEL Performance glasses are executed in sparkling fine crystal, and feature long fine stems and large stable bases.

RIEDEL Performance's unique optic impact not only adds a pleasing visual aspect to the bowl, but also increases the inner surface area, allowing the wine to open up and to fully show every aroma and subtle nuance. The grape varietal specific shapes in RIEDEL Performance, when combined with the optic impact, deliver ultimate wine enjoyment, making RIEDEL Performance the new essential 'must-have' wine glass collection for all wine-lovers.

**RIEDEL VELOCE (2022)** is an impressive development based on state-of-the-art technology from Riedel's own factory in Weiden, Germany. Riedel wine glasses are developed through workshops in different shapes and sizes for specific grape varieties. Only highly advanced machine production can guarantee such precise and functional glass design language, in harmony with the respective profile of grape variety.

## RIEDEL'S BENCHMARK

**VINUM (1986)** was the first machine-made glass in history to be based on the characteristics of grape varietals. VINUM was not developed on a drawing board, but in tasting workshops, based on performance, where the content commands the shape. The pleasure of enjoying fine wine starts with the right glass.

## FOR SPIRITS SERVED NEAT

**RIEDEL BAR (2008)** is composed of stylish and functional glasses designed to enhance the enjoyment of spirits. The series showcases the aromatics and flavor characteristics, while minimizing the bite of alcohol. RIEDEL adopts the same approach in developing spirits glasses as they do to refine their wine glass shapes. Tasters determine which forms show the most popular spirits and fortified wines to their greatest advantage on the nose and palate, without losing the carefully crafted nuances of distillation to the dominance of alcohol.

## DESIGNED FOR NEW WORLD WINES

**EXTREME (2018)** was developed in sensory workshops by experts, Extreme glasses from RIEDEL are specially designed for the optimum enjoyment of new world wines. Executed in clear, brilliant crystal by RIEDEL in Bavaria Germany. Extreme perfectly shows the true colours and depths of the wine. Extreme glasses feature a broad, angled, grape varietal specific bowl, which enhances the wines aromas, opening up the wine to reveal every subtle nuance. Extreme delivers the wine perfectly onto the palate, balancing and harmonising the fruit, acidity and tannins and highlighting the wines delicious flavours.

THE O WINE TUMBLER

---

**20 YEARS**

ANNIVERSARY

# THE O WINE TUMBLER

## FOR EVERY DAY WINE ENJOYMENT THE ORIGINAL STEMLESS WINE TUMBLER

**RIEDEL THE O WINE TUMBLER (2004)** is the first varietal specific wine tumbler in history. RIEDEL The O Wine Tumbler is an innovative take on the casual wine glass, giving total wine enjoyment. RIEDEL The O Wine Tumbler is based on the benchmark shapes of VINUM to enhance the world's most important grape varietals. The tumbler, used for centuries as an allround drinking vessel, is turned into a sophisticated wine accessory. Broken stems are a thing of the past.

## DECANTER

*"I prefer to decant wines, both young and old. It's a sign of respect for old wines and a sign of confidence in young wines. Decanting old wines, just a few moments before they are served, helps to ensure that the wines' clarity and brilliance are not obscured by any deposit that may have developed over time. Decanting young wines several hours before they are served gives the wine a chance to bloom and attain a stage of development that normally requires years of ageing."*

CHRISTIAN MOUEIX, PRESIDENT OF THE NÉGOCIAINT  
HOUSE ÉTABLISSEMENTS JEAN-PIERRE MOUEIX

RIEDEL offers cleaning beads, which can aid in removing tough stains inside the decanter. DO NOT use the beads on our closed end decanters such as Ayam, Eve, Curly, Boa, Mamba, Horse, Twenty Twelve, Swan, Face to Face, Evechen and Horn as well as all Limited Editions.

The RIEDEL FAMILY has been in the glass business for 300 years, with 11 generations keeping the family business intact. The Riedel story begins in 1678 in the northern part of Bohemia – bordering Schlesia – today the Czech republic and Poland respectively. This part of Bohemia was a German speaking enclave known as the Sudetenland.

The Venetians brought back the knowledge of glass making from the Near East around 1000 A.D. The knowledge of producing glass spread slowly towards the northern part of Europe, searching for energy, critical to the melting of glass. Wood was the source, causing a glassmaker migration to the forests. Due to this migration, a glass culture developed in Bohemia in the 17<sup>th</sup> century.

The **FIRST RIEDEL** in the trade of luxury glass goods was Johann Christoph Riedel, born in 1678. He journeyed all over Europe trading glass, traveling as far as Spain and Portugal. The earnings from the business justified the arduous and dangerous travel. Johann Carl, **2<sup>ND</sup> GENERATION** (1701–1781) was a gilder and glasscutter. He operated his own workshop refining glassware.

**3<sup>RD</sup> GENERATION, JOHANN LEOPOLD RIEDEL** (1726–1800), made his fortune in the Seven Years' War (1756–1763) fought

between the Austrians and the Prussians over Bohemia and Schlesia. The demand for window panes needed for rebuilding the surrounding cities and villages destroyed during the war provided Johann the chance to found his first glass factory, which he opened on May 17, 1756. His success was based on his invention of a technique that substituted stained glass windows with window panes.

**4<sup>TH</sup> GENERATION ANTON LEOPOLD RIEDEL** (1761–1821): expanded his father's business, as well as consolidating and enlarging it. The product range was transformed. It was no longer focused on plate glass, but much more on luxury articles. This led to the development of new and lucrative sectors: the production of hollow glass and refinement through surface finishing, and the production of chandelier crystal.

**5<sup>TH</sup> GENERATION FRANZ XAVER ANTON RIEDEL** (1786–1844): was a famous engraver and glass cutter of considerable talent and craftsmanship. He signed his artworks, which are highly sought after at auctions today. He was able, for the first time in the history of glass, to melt different colors of glass: two

fluorescent colors – yellow and green. The two colors have been recorded in literature as Anna Yellow and Anna Green, being named after his daughter.

**6<sup>TH</sup> GENERATION:** The son of his brother, Josef Riedel, was employed as an assistant at the age of 14. In 1840 at the age of 24 Josef married his cousin Anna, Franz Xaver Riedel's daughter.

**JOSEF RIEDEL THE ELDER** (1816–1894) not only showed great talent, but he was also lucky to have lived at the start of the industrial age. He has gone down in history as the "Glass King of the Jizera Mountains".

Josef Riedel the Elder left the Waldglas works and shifted production to the valley. He took advantage of the newly opened train line in 1875. It provided access to the most important sales

markets of the industrialized world and laid the foundations for further expansion of his business.

His first wife Anna died at the age of 36. His son, from his second marriage to Johanna Clementine Neuwinger, took the Riedel dynasty into its 7<sup>th</sup> Generation.

**7<sup>TH</sup> GENERATION: JOSEF ANTON RIEDEL THE YOUNGER** (1862–1924) was a gifted chemist and extremely talented engineer. In his glassworks 600 precisely defined colors could be melted in order to produce glass beads and gifts. As a mechanical engineer, he developed the finishing and automatization of the production of glass beads and registered numerous patents for this.

**8<sup>TH</sup> GENERATION: WALTER RIEDEL** (1895–1974) inherited his father's talents. He brought about many technical developments in the glass industry and came up with numerous inventions, such as spinnable glass fibers, signal colors, reflectors, elaborate laboratory glasses and much more.

He steered the company towards technical glass production and in doing so reacted to the needs of the interwar period.

In 1944 the German Ministry of Aviation set up the secret project called "Tonne", a ground-based system of air reconnaissance using radar. At the time the monitors used for this measured a maximum diameter of 38 cm. Only Walter Riedel and his glass engineers were capable of doubling the dimensions, and as a result also the resolution. They produced a monitor with a diameter of 76 cm – a real global revelation at the time.

Walter Riedel recognized the potential of this invention and secured the rights to use the development after the end of the war for civil purposes. However, this plan was thwarted by the Russian occupying forces. The scientist Walter Riedel was arrested in May 1945 and conscripted. This ended the Bohemian Riedel family history. After the Second World War the family was dispossessed, lost all their property, all their factories and the entirety of their private assets.

Walter Riedel finally returned in 1955 from imprisonment. 1956 – 200 years after the founding of the first Waldglas works in Bohemia - the new Riedel story was started up in Kufstein, Austria. With the support of the Swarovski family, Walter Riedel and his son Claus took over the ailing Tirol glassworks. A hand-blown glass production firm – as it was before in Bohemia – was established.

Walter Riedel represents both the Bohemian past and the start into a new future in Austria.

**9<sup>TH</sup> GENERATION: CLAUS JOSEF RIEDEL** (1925–2004): He was a great visionary. Thanks to his considerable artistic talent and his extraordinary feel for form and proportion, he came up with a pioneering invention by defining the wine friendly wine glass. He became the "father of the modern wineglass". Claus J. Riedel was the first in the history of glass who could determine the interplay between form, size and rim diameter of

a glass for the optimal enjoyment of wine. His glasses had a long stem, were smooth, undecorated and blown to be thin. In the 1950s and 1960s they were awarded numerous design prizes. In 1973 he created the pioneering innovation whose discovery was to once again turn the name Riedel into a glass related world leader: the first line dedicated to wine-enjoyment. They are known all across the world today under the name „Sommeliers“.

**10<sup>TH</sup> GENERATION: GEORG JOSEF RIEDEL** (born 1949) used his world vision to take Riedel glass to global success. In as early as 1979 he recognized the importance of the American market and founded the subsidiary company "Riedel Crystal of America". In 1986 he introduced the first machine-made glass based on wine varieties in history – Vinum!

With Vinum Riedel has been able to turn the philosophy of the functional wine glass developed by the company into something affordable and therefore also well-known around the world.

As a means of consolidating the business, Georg Riedel took over the German Nachtmann company in 2004. This laid the foundations for further growth. Today Riedel has a 97% export rate and is the absolute world leader in the production of functional glasses.

Georg Riedel, in his long career as a glassmaker and glass designer, has shaped many functional glasses, each specifically designed to enhance the enjoyment of the liquid flow. As the leading mind behind varietal specific wine glasses, Riedel strongly believes that a finely tuned glass shape enhances the perception of all aromatic beverages. His latest creation – Riedel Winewings (2020) and Riedel Winewings SL (2021) – once again is pushing the boundaries of the conventional wine glass shape and is striking in its design.

As the company owner he continues to be in daily support of his management. Specifically looking after the North American market, improving manufacturing and efficiency of machine-made production in the core Riedel factories in Bavaria Amberg and Weiden. His hobby and love are figures and developing new software to improve operations.

**11<sup>TH</sup> GENERATION: MAXIMILIAN JOSEF RIEDEL** (born 1977) has been working for the company since 1997.

At age 25, he became CEO of Riedel Crystal of America, the most important markets for the family business.

He proved his talent for management, building up North America into the largest export market for Riedel. In addition to his function as CEO, Maximilian has also made an excellent name for himself across the globe as a designer of decanters and glasses.

In 2001 he kicked off the Riedel focus for the on premise by creating Riedel Restaurant which has grown to be one of two legs on which the Riedel success is built on.

By 2004 he showed his creative talent when he designed the "O" series consisting of stemless, varietal specific wine glasses and the "first free" formed Riedel handmade decanter Cornetto which was the birth of many more "free formed" decanter designs to come. All of his designs have received numerous design awards since then.

Maximilian Riedel was instrumental in developing the Riedel strategy for online sales which have become Riedel's most important sales channel for "direct to consumer" business.

Maximilian Riedel is a person that connects people, he initiated partnerships with Miele etc.

He is very socially engaged and started to give back by supporting Cancer organization, Aids organization and many local partnerships such as The Napa Valley wine auction etc.

Since the emergence of social media, communication with end consumers has become significantly stronger, and consumers now have access to other platforms. Maximilian Riedel recognised this development early on and took advantage of it. Not only the company now uses social media to cultivate direct contact with consumers through daily communication, regular competitions and comments from the managing director himself. On 1 July 2013, Maximilian was handed the management of Tiroler Glashütte and its worldwide subsidiaries by Georg J. Riedel.

Since then he has been leading the company through challenging times with great finesse and success and meeting the requirements that range from sustainability to increasing the efficiency of production and logistics through to Covid-19.
